Cellular Modification Medical Unit

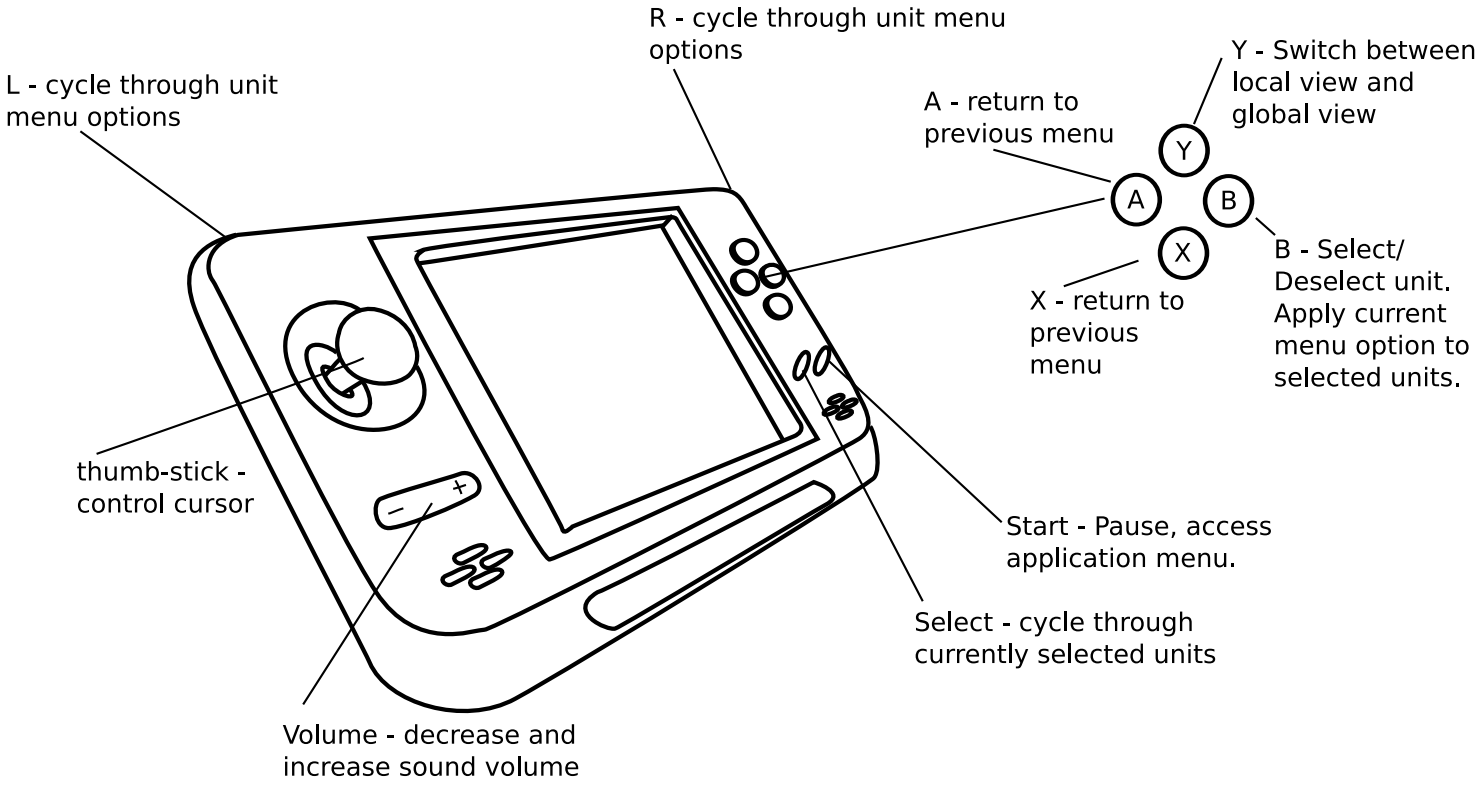

Quick Reference Guide

Thank-you for purchasing Up Multimedia's **Cellular Modification Medical Unit** (CMMU), the world's most popular nanotech-based portable medical unit.

The CMMU has the following core features:

- Advanced operating system to assist with diagnosis and treatment
- Easy loading of new sample tissue from patients
- Laser-guided fusing of nanotech machines with ordinary human cells
- Portable, with half hour battery life on two AA batteries.
- User-friendly heads-up-display (HUD) for superior operation.
- The ability to synthesise twelve alcoholic cocktails (not available in the cheaper 2X model).

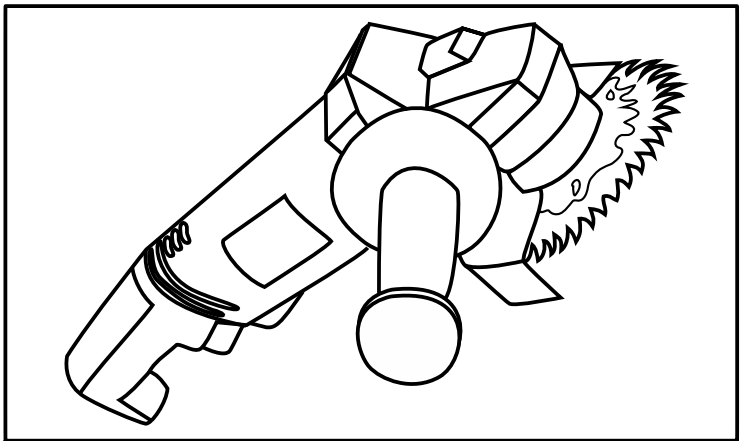

The CMMU has already been deployed to battle zones and quarantine zones around the world, and, as a new owner, you will be pleasantly surprised to hear that patients treated with the CMMU have a survival rate of almost 1.37%!

If you like our Cellular Modification Medical Unit, you'll LOVE our new **HIGH-SPEED AMPUTATION MACHINE 9000** (HAM 9000), available NOW from all good military-industrial complexes.
